SPB
SCOTIA PRECISION BAROMETER

The Scotia Precision Barometer has been designed to provide outstanding accuracy in a lightweight convenient package for laboratory and field applications.

The barometer is operated via the touchscreen application. Aviation datum offset functions are available and can be determined with user defined inputs according to location.

- Pressure range: 700 – 1300 mbara
- Accuracy: $\pm 0.015\%$ FS (± 0.09 mbara)
 - -40 to +85 degC compensated temperature range
 - ± 50 ppm FS per annum
 - resolution: 0.01 mbara
- 5" Full colour touchscreen display
 - live sensor readings
 - real-time graph function
- Multiple unit options including mbar, hPa, mmHG, inHg, psi, etc
- Logging function: 1 recording per second
- Avionics parameters calculated and displayed including QNH, QFE, QFF, and MSL Altitude
- Leak test function
- Data retrieval via Bluetooth download or USB memory stick
- Rechargeable battery life: 15 hours approx.
 - UN38.3 rated battery is certified for transport by air
 - Full charge 8 hours; top-up charge 4 hours
- Pressure connector accepts 6mm OD / 4mm ID tubing (1/4" OD / 5/32" ID)
- Weight: 1.7kg approx
- Dimensions: 220 x 167 x 90mm approx

Equipment supplied as standard: SPB, collapsible charger plug and cable, USB transfer cable, stylus pen, quick-guide card and barb adapter. All fitted within the custom protective case.
